HOW IT WORKS

Dromos BT pairs with your phone through a dedicated application, completely developed in India.

FIND THE LOST

Attach the paired Dromos BT with your belongings (house keys, wallet, handbag, camera etc.). You can pair multiple devices with one phone. All paired devices will be visible in the application. Name each device for easy identification. Tap on the corresponding name and the device will start beeping.

Pressing the button on the device will make your paired phone sound alert and display the corresponding device name.

CLICK THE PICTURE

Tap the camera icon on the Dromos application to start your phone camera. Pressing the button on the device twice will switch between front and rear camera. Pressing the button once will click the photo.

CALL THE HELP

This is 'Android only' feature for now.

Pressing the device button twice you can send alert to pre-selected phone number through SMS and phone call without taking out your phone. SMS sent carries the current location of your phone to view on Google Map instantly.

Enable 'Location' and 'Bluetooth' on your phone for this feature to work.
